

MARITIME NEWS OF THE YEAR

The Panama Ship Registry has been recognized by Guinness World Records, as the **“Largest Ship Registry of the World”**, or having more than eight thousand ships which account for 18% of the international maritime world fleet.

We have been serving the world for 100 years, while promoting maritime trade and favoring its complete development. Having reached such level of excellence represents recognition to the service of quality we offer, this being a significant pride for all Panamanians as well as for our strategic allies globally.
